I confirm that all statements made in this application are correct, truthful and complete. I agree that the university may verify the authenticity and accuracy of the documents and information I have provided. I also understand and agree that if the university determines that I have provided false or misleading information, it has the right to contact appropriate individuals, institutions or organizations affected by such false information and to inform them of its discovery. The university has the right to send my educational documents to ENIC/NARIC Center for evaluation.

After receiving all required documents the university will send those to ENIC/NARIC Center for evaluation. The ENIC/NARIC Center evaluates foreign qualifications.

ENIC/NARIC Center is a special organisation, set up by the national authorities, that evaluates all international students documents. It generally provides information on the recognition of diplomas, degrees and other qualifications and they are independent. It also evaluates the documents in general (they will see if you have access to higher education based on your previous education).

Dasturiy injiniring ta'lim yo'nalishi talabalariga avtomatlashtirilgan loyihalash tizimlarini, kompyuter tizimlarining matematik hamda dasturiy ta'minotini, axborotlarni qayta ishlashni, mikroprotsessorli tizimlarning dasturiy ta'minotlarini, dasturiy mahsulotlarni ishlab chiqishga joriy etish va foydalanishning samarali usullar va uslublar majmuasini o'z ichiga olgan fan va texnologiyalar sohasiga asoslangan bilimlarni berishni ta'minlashdir. Dasturiy injiniring ta'lim yo'nalishi doirasida talabalar loyihalash usullarni tadqiq qilish, dasturlash jarayonlarini tahlil qilish, sintezlash va optimallashtirish usullarini qo'llash hamda mahsulotni sertifikatlashtirish, dasturiy ta'minot yaratishda axborot bilan ishlash jarayonlari bo'yicha matematik modellarni qo'llash, hisoblash algoritmlari va dasturiy ta'minot yaratish, dasturiy tizimlarni loyihalash va ishlab chiqish, dasturiy va qurilma-dasturiy ta'minotni integratsiyalash, avtomatlashtirilgan axborotni qayta ishlash va boshqarish tizimlarini yaratish, avtomatlashtirilgan loyihalash tizimlarini boshqarish, ushbu tizimlarni matematik, dasturiy, tashkiliy va huquqiy ta'minlash usullarini o'rganish va tadbiq etish kabi nazariy bilim hamda amaliy ko'nikmalarga ega bo'ladi. Umumiy o'rta, kasb-hunar ta'lim muassasalarida informatika va axborot texnologiyalari fani bo'yicha pedagogik faoliyatni amalga oshirishi mumkin. / Software engineering faculty provides students with knowledge in the field of science and technology, including automated design systems, mathematical and software support of computer systems, information processing, software for microprocessor systems, a set of effective methods and techniques for the development and use of software products. At the faculty of software engineering, students gain theoretical knowledge and practical skills, such as research of projecting methods, analysis of programming processes, synthesis and optimization of programming processes and certification of products, application of mathematical models on information processing in software development, development of computational algorithms and software, design and development of software systems, software and hardware-software integration, development of automated information processing and management systems, management of automated projecting systems, research and implementation of methods of mathematical, software, organizational and legal support of these systems. Pedagogical activities in the field of informatics and information technologies can be carried out in general secondary, vocational educational institutions.
